FOR THE HORSE.

A Valuable Harness Attachment.

The illustration accompany-
 ing this article is a simple de-
 vice, and yet every horseman
 will see the merit of it upon in-
 vestigation. It is a harness at-
 tachment especially adapted to
 breaking horses, or managing
 and subduing animals, whereby
 complete control may be ob-
 tained over a beast by the use
 of a single safety rein. The de-
 vice is composed of a surcingle
 having two pulleys. The pos-
 tern strap has an eye to which
 one extremity of the rein is at-
 tached, and passing around the
 pulleys extends back between
 the rear legs of the horse. By
 its use the animal may be easily
 thrown upon its knees, and fi-
 nally upon its side, if desired, by

the use of a single strap or rein. For horse trainers and all interested in
 the breaking or subduing and controlling of ungovernable animals of all
 kinds, this device will be found of much value.
